7. Items from the floor

- a. Kilpatrick brought up an opportunity to put a proposal forward to put forth a policy around email distribution to students, given that that they are inundated. The recent differentiation of email listservs was shared by Bry and Smith. Student reps shared that part of the problem is using their FSU email to subscribe to organizations (e.g. retail stores for deals) outside of the institution. With that perspective, the committee acknowledged that any campus community member(s) can submit a proposal through the AUC process but that it is not within the purview of this committee to take on such issues by submitting AUC proposals to address.
