AUC 60: Renumber Comm Media department courses

Motion: Kisha Tracy Second: Rachelle Dermer

Sponsor: Kevin McCarthy

Make the courses more consistent across the concentration and for the levels and prerequisites for courses. How we do electives according to the requirements of each program. (By 100's) 1st number is level and second number is the content level.

Registrar demonstrated why there is a timing issue: Registrar has compiled all the requests that came in. Means they have to deactivate then reactivate the course, degree works, prerequisite changes. As they're coming in and student already registered, implementation of fall 2025. This gives us extra time to get there, it will be less confusing advising wide as well so students know that numbers won't match up now but going forward fall 2025.

This will be taught by different faculty from different departments. Variety of different disciplines. This is meant to be stand alone and also a core course for IDIS minor. Will serve as scope of issues that all minors will take so they are all on the same page. Introduce them to career options in the field and sense of how different disciplines are going over this.

Curriculum had a few amendments.

Has taught version before this is a more focused version. Looking at cultural history of nature, art, poetry, advertising, scientific maps and such, writings. Looking at it form a broad range. Understand how concept of nature has changed over time. Will be looking where we are now and how to look at concept of nature and sustainability for the future.

Gen Ed discussion: No diverse perspectives in the course objectives. Looking at ocean maps, south pacific, early nature war ships. Don't see anything in course objectives member stated. Will be looking at culture artifacts to show that different cultures with the nature discussions in the course. Rise of western science in the 16th century. South pacific people use ocean maps. Overtime across cultures.

Syllabi are usually an addendum to proposal itself.

Someone said they see it in the syllabi course objective overtime and across cultures and on form itself on number 10 student learning. Culture shape around the world and time.

Motion: Kisha Tracy Second: Amy Wehe

Sponsor: Barbara Cormier

Edits are more to clarify what process was that was not in the original version and clarify for when they return. How each return is different. Further clarification on financial aid process as well.

We haven't had anyone return since it is a new policy we just want to get ahead and we thought it would be confusing so we decided to make it clearer and easier as possible for them.

AUC 47 – New Course: Luxury Brand Management w/ Gen Ed

Motion: Kisha Tracy Second: Amy Wehe

Sponsor: Renee Scapparone

Offered as topics course and now want it to be a day course. The course is being well received it was last year when we took students to Milan. It is not just for business student. We had psych, nursing, and construction management students. We have 10 applicants already and those are mix majors as well. It fits well with our program

Curriculum said to change number and course description. And whether study abroad should be added to title? We're staying in Milan, cause in the area of luxury. It was well received to go to Milan. We wanted to NY but wanted to give them international flavor. Marketing and management areas. Cause brand management and organization. It's not just marketing overview. Other strategies they go over. Feels if we put in title it restricts us but is open to change it. Its' in course description to change it to IHIP you would need to be either study abroad or study away.

Committee member wanted to state for the record that John Crawley had a huge part in this and he was part of the curriculum committee for a long time.

Amendment from Kisha: We need to strike (under #9) the number 2230 because there is a course that already has that number. Curriculum had a friendly amendment for second course for curriculum.
